Durability that Means Business

EWINDER

The DuraClass® Sidewinder™ Strength, Functionality and Versatility, All Year Long!

The unique design of the DuraClass Sidewinder™ body sidewall features a continuous top rail, side and running board configuration. Without an outside seam weld below the top rail, moisture and freeze problems are virtually eliminated! The Sidewinder is able to spread sand or salt up to 25 feet (the width of two full traffic lanes) with continuous feed from the dump body. A tilting side with front discharge allows material to be spread on the centerline for better coverage. Plus, material is discharged in front of the rear axle providing better traction for the operator. Premium high quality construction includes: rugged, COR-TEN® steel, a heavy-duty box braced tailgate, full depth corner posts with additional support added to the right rear post and continuous 100% welding on the body.

The Sidewinder features a stacked structural steel understructure with channel crossmembers, I-beam long members and a front mounted inverted telescopic hoist with hard chrome plated sleeves. Also shown are the chain guard (1) and remote grease access (2).

STANDARD FEATURES SIDEWINDER & S

- Steel options include: AR450, stainless steel and many others
- Spinner baffle kit
- Tailgate chutes for sand or salt to control material flow
- Grease chain adjusters
- Four section body screens 3" x 3" mesh, 3/8" diameter rod with 1/2" x 1/2" x 1/4" angle frame
- Summer Chute

FEATURES – SIDEWINDER & SIDEWINDER

Manual chute control

Discharge box/chute

1) Gear box for chains

The DuraClass® Sidewinder Jr.™ Compact & Capable!

The 3-4-yard **Sidewinder Jr.™** is ideal for medium-duty truck applications, in addition to winter snow and ice control. Salt and sand are delivered to the front of the Sidewinder Jr.'s tires through a conveyor system, providing added traction for traveling up and down hilly terrain. The compact unit easily maneuvers on narrow roads, metro areas, and locations where minimum clearance is a concern. Plus, Sidewinder bodies provide a lower cost of operation versus traditional spreaders, which are costly and difficult to maintain and store.

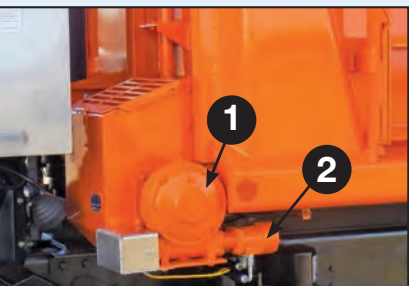

FEATURES & OPTIONS SIDEWINDER JR.

- Removable conveyor
- Pre wet cab shields with cut out available
- Central lube
- Swing gate
- Remote access panel for grease
- Piano style hinge floor
- Aluminum tailgate option
- Chutes installed in door
- Chain guard

The versatile Sidewinder & Sidewinder Jr. combine snow and ice removal capability with conventional dump body functionality for year-round service!
