

# SEMI-AUTOMATIC ARMLESS TARPING SYSTEMS

*The driver raises the gantry, flips the deployment rope over the container, walks to the rear, pulls the cover over the load and uses pig tail tie-down system to secure the rope. He then lowers the gantry.*

## Hi-Roller HR2000PP/PTO Covers 20 to 50 yard containers

- ▶ 2-stage heavy-duty cylinder extends gantry to 13'
- ▶ Strong and solid hydraulic gantry system has self-contained support members, no gusseting required
- ▶ Gantry adjusts from 68" to 156": powered by 12 volt power pack or truck PTO
- ▶ Audio and visual "Up-Gantry" alarm system in cab increases safety
- ▶ Operation is smooth, quiet and simple
- ▶ Gantry legs deploy through bearing rings, minimizing play between stages for smooth, quiet operation
- ▶ Fewer moving parts, no chains, sprockets or pulleys
- ▶ 8' by 31' shade mesh tarp with pig tail tie-down system
- ▶ Available with 12 volt DC power pack or PTO powered version

*Patent #6,896,312 B2*

## Hi-Roller HR1000PP/PTO For single axle hook lifts and cable hoists, covers up to 16' containers

- ▶ Gantry adjusts from 64" to 104": powered by 12 volt self-contained hydraulic power pack or PTO powered
- ▶ Quick covering operation
- ▶ Economical system
- ▶ 9' by 19' heavy-duty mesh tarp
- ▶ Driver secures the rope to the tie-down cleat
