Structureline Platform

PCS9618 with custom tail skirt shown with BHLBE6296

The Structureline Platform is built for rough and heavy duty service. It's suitable for many applications, including crane, lumber, pipe and steel hauling bodies. With its high strength structural steel frame, the Structureline is one super heavy duty flatbed. Load it down and work it hard, it can handle your toughest job. Check out the Structureline Platform at your local distributor. Put one on your truck today!
