RETRAXONE™

THE LAST BED COVER YOU'LL BUY™

**The sturdy, stylish way to keep
your gear secure and dry.**

Made in the USA

Never Binds, No Straps Required

The RetraxONE™ retractable pickup bed cover is made from tough, weather-resistant polycarbonate. Sealed ball-bearing rollers ensure that the RetraxONE™ opens and closes easily without the use of pull straps, velcro, snaps or springs.

Unique Spiral Track System Eliminates Wear And Tear

The compact spiral track storage system prevents the cover from coming in contact with itself as it retracts, minimizing wear and tear.

Your Truck Will Turn Heads

The patented design incorporates a front cover that is flush with the rolling cover – streamlining the overall appearance. Automotive-grade weather stripping provides a dependable seal to help keep the truck bed dry.

Tempered Aluminum Support Beams For Dependability You Can Count On

These beams embedded into the polycarbonate sheet add strength to support heavy snow loads and ensure quiet, stable travel at any speed.

Key Lockable In Any Position For Security And Flexibility

The RetraxONE™ cover is lockable in any position along the rail, allowing for unlimited hauling flexibility.

The RetraxONE™ Also Comes In Silver

Ask your dealer about a RetraxONE™ now, or go online to retrax.com.

PowertraxONE™

Open And Close With The Touch Of A Button

The PowertraxONE™ retractable cover features the same great benefits of the RetraxONE™, but allows for hands-off operation via wireless remote control. Locks in any position along the rail using an electromagnetic brake and includes an integrated cargo light located on the spiral canister.
