

## FloorLiner™

WeatherTech's designers and engineers have worked tirelessly to develop the most advanced vehicle protection system available today. The WeatherTech® FloorLiner™ lines the interior carpet up the front, back and even up the sides of the vehicle's footwell. This ultimate protection helps to provide the assurance that a vehicle will maintain the long-lasting comfort and interior appearance that an owner wants from their investment.

Each and every designed FloorLiner™ application goes through an intense series of measurements, fittings, design and mold creation before it will become available on the accessories market. Starting with 3D laser measurements of the interior surfaces, raw data of each vehicle is collected and processed. Designers utilize this data to create a 3D prototype part that is fitted into the vehicle and, if necessary, make adjustments until the fit of the product fits seamlessly to the contours of the vehicle. A mold is then machined out of aircraft grade aluminum and water cooled to maintain a consistent production quality.

The WeatherTech® FloorLiner™ provides a custom-fit solution to spills, debris, tracked in weather and more. Made from a patented multilayer material, FloorLiners provide a rigid core for strength that helps to retain its custom-fit shape, while offering a soft tactile top surface that feels comfortable underfoot. Specially designed channels carry fluid and debris to a lower reservoir, away from shoes and clothing. Easy to clean and easy to install. Available for cars, trucks, SUVs and minivans in black, tan and grey.

For questions or to place an order, contact HAWKEYE TRUCK EQUIPMENT at 515-289-1755 or 1-800-622-8223.
